

TEACHING EVALUATIONS

Pursuant to the resolution of the University Education Council, UW Teaching Assessment Surveys are carried out in all units using a common survey system integrated with the USOS system. The student survey is based on a short questionnaire regarding the evaluation of classes, available in two language versions - Polish and English.

The survey should be conducted during the last classes in the semester and allocate 10-15 minutes of classes for it. If there is a final exam in the last class, the survey should be carried out in the penultimate class.

It is important that the instructors encourage students to answer the survey questions during the classes and provide them with information on how to access the surveys.

Description of access to the survey system:

On the USOSweb website: Go to the For students tab, select the Polls item, and then go to the poll on the given classes.

In the Mobile USOS UW application: In the main menu of the application, select the Polls item, and then go to the survey regarding the given classes.

The surveys will be active from 29 May till 18 June 2023.

The evaluation process is described in details in the resolutions of the University Council for Education:

- No. 21 of April 30, 2021 (the resolution contains the current survey questionnaire)
- No. 26 of August 28, 2020
