	WISP TUTOR/SUPERVISOR LIST 2026/2027			
Name and surname	**E-mail**	**Topics**	**Empirical Paper** (Tutor)	**Master's Thesis** (Supervisor)
Aleksandra Bala, PhD (dr hab.)	abala@psych.uw.edu.pl	Clinical neuropsychology.	YES	YES
Prof. Kamilla Bargiel-Matusiewicz	kmatusiewicz@psych.uw.edu.pl	Topics regarding the integration of knowledge of medicine and psychology, in particular with relation to self-esteem, self-efficacy and strategies of coping with stress and the meaning of psychological wellbeing in this context.	YES	YES
Prof. Michał Bilewicz	michal.bilewicz@psych.uw.edu.pl	Research in political psychology and intergroup relations – such problems as dehumanization, contact hypothesis, stereotyping and prejudice, forgiveness after conflicts, intergroup emotions.	YES	YES

Wouter de Raad, PhD	wderaad@psych.uw.edu.pl	Topics related to cultural differences. Topics related to learning in higher education.	YES	YES
Prof. Małgorzata Dragan	mdragan@psych.uw.edu.pl	Childhood adversities and psychopathology, traumatic experiences and emotion regulation, psychoactive substances - psychological aspects, metacognition in emotional disorders.	YES	YES
Anna Gabińska, PhD	anna.gabinska@psych.uw.edu.pl	Social clinical psychology. Her research interests focus on personality disorders and the theory of the dialogical self.	YES	NO

Prof. Małgorzata Gambin	mgambin@psych.uw.edu.pl	– child and adolescent psychopathology especially: attention deficit hyperactivity disorder, conduct and oppositional-defiant disorders, emotional disorders – family functioning of children with above mentioned disorders – mentalizing, empathy and self-concept in children and adolescents – self-control processes e.g. executive functioning, motivational processes and emotion regulation in children and adolescents	YES	NO
Maciej Górski, MA	maciej.gorski@psych.uw.edu.pl	Cross-cultural psychology, political psychology, authoritarianism, prejudice, subjective well-being, social class and inequality, political polarization, protests, and collective action.	YES	NO
Prof. Ewa Haman	ewa.haman@psych.uw.edu.pl	Aspects of developmental psycholinguistics: cross-linguistic and crosscultural comparisons; bilingual and multilingual language development; lexical development (including word-formation); the role of early reading practices in child development.	YES	YES

Prof. Maciej Haman	maciej.haman@psych.uw.edu.pl	Conceptual knowledge, especially in young children (infants and preschoolers) but also in adults.. We use behavioural experimental methods, as well as imaging techniques (eye tracking, including pupil dilation indices, with some possibility of using EEG/ERP method).	YES	YES
Prof. Karolina Hansen	karolina.hansen@psych.uw.edu.pl	Social psychology, sociolinguistics, and intercultural psychology, and include topics such as impression formation, language and accent attitudes, stereotyping and prejudice, gender-fair language, linguistic biases, and intercultural differences in social cognition. Profile: https://psych.uw.edu.pl/o-wydziale/pracownicy-2/hansen-karolina/	YES	YES
Prof. Kamil Imbir	kimbir@psych.uw.edu.pl	Emotions and motivation, emotions and cognition, sources of emotions.	YES	YES

Prof. Konrad Jankowski	konrad.jankowski@psych.uw.edu. pl	Differences between “larks” and “owls” (morningness-eveningness); sleep health. Rhythms in performance and mood/well-being (daily; weekly; seasonal). Individual differences and personality. Mating and sexual behaviour.	YES	YES
Dorota Karwowska, PhD	dorota.karwowska@psych.uw.edu.pl	My research interests focus on implicit social cognition, unconscious information processing, and the interplay between emotion and cognition. I am particularly interested in how non-conscious mechanisms shape social judgments, decision-making, and interpersonal behaviour. More broadly, my work is situated within contemporary social psychology, with an emphasis on empirical approaches to studying subtle, automatic, and affectively driven cognitive processes.	YES	YES
Rafał Kawa, PhD	rkawa@psych.uw.edu.pl	Autism spectrum disorders - diagnosis, intervention and families of children with ASDS.	YES	NO
Prof. Grażyna Kmita	grajka@psych.uw.edu.pl	Culture and parenting, parent-child interactions/relationship/ attachment, preterm birth, infant mental health, developmental disorders.	YES	YES

Dorota Kobylińska, PhD	dorotak@psych.uw.edu.pl	Emotions and motivation, regulation of emotions, stress and resilience.	YES	YES
Grzegorz Krajewski, PhD	krajewski@psych.uw.edu.pl	Developmental psycholinguistics, development of grammar, measuring language development, also using CAT and online tools. Collaboration possible within research projects currently being carried out at MutliLADA Lab (see: https://multilada.pl/).	YES	YES
Marcin Leśniak, PhD	marcin.lesniak@psych.uw.edu.pl	Neuropsychological diagnosis (adults) and rehabilitation; cognitive assessment; computer-assisted cognitive training.	YES	NO

Prof. Emilia Łojek	emilia.lojek@psych.uw.edu.pl	Neuropsychology of HIV infection.	NO	YES

Paweł Łowicki, PhD	pawel.lowicki@psych.uw.edu.pl	Religion & Spirituality.	YES	NO
Ewa Malinowska, PhD	ewa.malinowska@psych.uw.edu.pl	Neuropsychological diagnosis and rehabilitation; executive functions therapies in neuropsychology as well as from developmental perspective; COVID 19 - neuropsychological consequences; central nervous system psychopharmacology; biological basis of behaviour.	YES	YES

Karolina Małek, PhD	kmalek@psych.uw.edu.pl	Qualitative research, psychotherapy, school and teaching.	YES	YES

Karolina Marcinkowska, MA	karolina.marcinkowska@psych.uw.edu.pl	Social and political psychology. Her research focuses on various aspects of humour, including its role as a coping mechanism and as a means of expressing prejudice. She also studies moral emotions in the context of collective violence, as well as broadly defined historical psychology.	YES	NO
Aneta Miękisz, PhD	amiekisz@psych.uw.edu.pl	Bilingualism and its impact on socio-emotional and/or cognitive linguistic development, Specific Learning Disabilities in particular Dyslexia, Developmental Language Disorder, Language acquisition and attrition in late adulthood.	YES	YES
Olha Mostova, MA	o.mostova@uw.edu.pl	Romantic relationships, individual differences associated with relationship quality, sexual satisfaction, love and affection and interpersonal functioning.	Yes	No
Karolina Muszyńska, PhD	karolina.muszynska@psych.uw.edu.pl	Child bilingualism, vocabulary development and language input effects in bilingual children, early language trajectory; Collaboration possible within research projects currently being carried out at MutliLADA Lab (see: https://multilada.pl/).	YES	YES

Prof. Andrzej Nowak	andrzej.nowak@psych.uw.edu.pl	Dynamical models in social psychology, computational models, computer simulations.	YES	YES
Prof. Ewa Pisula	ewa.pisula@psych.uw.edu.pl	Developmental disorders, autism spectrum, families with children with developmental disorders, how children and adolescents cope with stress.	YES	YES

Agnieszka Pluta, PhD (dr hab.)	apluta@psych.uw.edu.pl	Social neuroscience, cognitive neuroscience, neuroimaging with a particular focus on fMRI as a tool to study cognitive processes, theory of mind in typical and clinical populations.	YES	YES
Prof. Joanna Rączaszek-Leonardi	raczasze@psych.uw.edu.pl	Psycholinguistics, cross-cultural differences in cognition connected to language differences, embodied cognition, dynamical systems and cognition, artificial intelligence in multiagent communicating systems.	NO	YES

Agnieszka Rojczyk, PhD	agnieszka.rojczyk@psych.uw.edu.pl	Developmental neuropsychology.	YES	NO

Dorota Rutkowska, PhD	dorota.rutkowska@psych.uw.edu.pl	Taking the perspective of other people and empathy, framing effect in decisions and persuasion, organisational and work psychology.	NO	YES
Prof. Marcin Rzeszutek	mrzeszutek@psych.uw.edu.pl	I invite students, who are interested in the following research areas: 1. Posttraumatic stress disorder (PTSD) – prevalence sociodemographic, personality and social risk factors for PTSD among various samples after traumatic events 2. Positive outcomes of traumatic events: the phenomenon of posttraumatic growth (PTG) – prevalence, sociodemographic, personality and social determinants among people after traumatic or highly stressful events 3. Psychological and social aspects of chronic illness as the specific example of HIV+ individuals and chronic pain patients – the influence of personality, stress coping, social support and spirituality	YES	YES

Maciej Siemiątkowski, MA	maciej.siemiatkowski@psych.uw.edu.pl	Factors influencing belief in conspiracy theories and susceptibility to misinformation. As part of his doctoral work, he examines how institutional structures, social conditions, and historical experiences contribute to the formation of conspiracy beliefs. He considers both objective country-level indicators - such as levels of freedom and the capacity to cope with emerging crises - as well as how these phenomena are subjectively perceived by individuals. Authoritarianism and populism, particularly in terms of their impact on behaviour and individuals' sense of control over their own lives. Additionally, he works on developing the use of artificial intelligence methods to design more effective manipulations for experimental research	YES	NO
Marta Sobańska, PhD	marta.sobanska@psych.uw.edu.pl	Cognitive neuropsychology, mathematical cognition, dyscalculia, mental arithmetic, acalculia.	YES	YES
Wiktor Soral, PhD	wiktor.soral@psych.uw.edu.pl	Psychology of intergroup relations (stereotyping, prejudice, discrimination, and hate speech). Psychological antecedents of belief in conspiracy theories. Control deprivation, learned helplessness, and sense of agency.	YES	YES

Magdalena Stec, PhD	m.stec@uw.edu.pl	Attitudes and attitude change, different types of stigma, eating disorders, psychology of lies and deception.	YES	NO

Prof. Maciej Stolarski	maciej.stolarski@psych.uw.edu.pl	Time perspective, emotional intelligence, personality vs. intellect, individual differences.	YES	YES

Prof. Adam Tarnowski	adam.tarnowski@psych.uw.edu.pl	Seminar in cognitive and traffic psychology. The seminar will be concentrated on research in cognitive psychology, in particular on visual attention and eye movements (eye tracking analyses). Another area of research will be driver behaviour, errors and their determinants.	NO	YES

Zuzanna Toeplitz, PhD	zuzanna.toeplitz@psych.uw.edu.pl	Developmental psychology, quality of life.	YES	NO
Sabina Toruńczyk- Ruiz, PhD	sabina.torunczyk-ruiz@psych.uw.edu.pl	Social psychology, environmental psychology, in particular topics related to intergroup relations, attitudes towards immigration, people's bonds with places and their determinants as well as consequences for intergroup relations and stewardship behaviour. I supervise papers using both quantitative and qualitative methods.	YES	YES

Mikołaj Winiewski, PhD	mikk@psych.uw.edu.pl	Collective violence, stereotyping and stereotype content, intergroup relations, prejudice, antisemitism, Islamophobia.	NO	YES
Prof. Marcin Zajenkowski	marcin.zajenkowski@psych.uw.edu.pl	- Narcissism - Personality - Intelligence - Mood and cognition	YES	YES

Marta Żegleń, MA	m.zeglen@uw.edu.pl	Developmental Psychology, parenting behaviours, work-family imbalances for parents, cross-cultural psychology, romantic relationships, emotions (e.g. guilt, shame).	YES	NO

*If you would like to write your thesis under somebody else's supervision, please contact the WISP Office.
